### It's not only the Gift in the stocking that's appreciated!

For instance, there really isn't any gift that you could possibly present to the family that would be more gratefully received than a GAS water heater. Sounds funny, doesn't it? But think it over. Once you install one of these GAS heaters, for years and years you are saving steps, you are saving time, you are saving fuel cost, in short, you are buying a necessity and not a luxury—if you are still heating water on the stove you are robbing yourself of one of the joys of living!

Call us up—let us tell you more!

### HUTTON IS NOT AFTER WAIALEE PRINCIPALSHIP

After considering the possibility of the position as principal of the Waialea Industrial School for Boys in event Hugh Tucker does not retain the position after January 1, W. H. Hutton of the Honolulu detective bureau has made the positive statement that he will not accept the position. "The position is one that will 'make or break' a man," Hutton says, "and unless the incumbent has full power, ample finances and enough assistance to allow him to devote his time to the boys while some one else keeps the books, he will fail and within the failure will incur a great deal of blame. It is a position that a man must give his whole time and his whole heart to, and he must have every encouragement."

"I visited the school and happened to arrive there the day after the outbreak some weeks ago. At that time I could find out little, but the boys I have spoken to are not satisfied."

"The principal of the school should not be content unless he is making good boys of bad boys, and then making them into good men. To merely discipline them and train them is useless. And to get results with the boys the principal must win their confidence and make their life at the school pleasant."

Wealthy New Yorkers living at Tarrytown, N. Y., stationed armed guards about their estates, following an attempt to blow up the home of John D. Archbold.
